

ABOUT US

The Industrial Biotechnology Innovation Centre was established to connect and support companies using industrial biotechnology processes and accelerate and de-risk commercialisation.

As a specialist organisation, IBioIC looks to stimulate the growth of the sector in Scotland to £900 million by 2025. IBioIC connects industry with academia and government and effectively uses these expanding networks to facilitate collaborations, provide open-access scale-up capabilities and enhance learning and development through the creation of a comprehensive skills programme; all of which are designed to meet the needs of the growing IB industry.

OUR AREAS OF INTEREST

Scotland is uniquely placed to build a world-leading IB sector, key strengths include:

- ▶ natural resources providing unique feedstocks
- ▶ strong Industrial leadership groups establishing IB in Scotland
- ▶ academic excellence – world leading experts active in IB
- ▶ industrial competitiveness - a diverse company base from SMEs to multinationals
- ▶ international competitiveness attracting inward investment in Scotland

IBIOIC NETWORK

IBioIC has established a substantial and growing national and international industrial membership with diverse interests in IB. IBioIC leverages academic excellence via its academic partners in Scotland and the North of England. We influence key policymakers and NGOs for the benefit of the industrial and academic network and act as a mouthpiece for the industrial biotechnology sector.

HOW WE CAN HELP YOU

We support the growth of our sector, and the businesses and people in it, through:

- ▶ opportunity identification & development
- ▶ financial & technical support for projects
- ▶ open-access equipment & scale-up centres
- ▶ a comprehensive skills programme, offering opportunities from HN to PhD level.

IBIOIC'S VISION

We will support business and academia to develop, de-risk, commercialise and exploit industrial biotechnology in global markets. We will lead the sector in Scotland to ensure that the technologies, skills and investment are available to deliver high-value, internationally competitive manufacturing businesses and, as a result, a dynamic and growing IB sector.
